

# Selection guide for Child restraints

(Use this chart as a guide for choosing your child's minimum milestones for progressing through their child restraints)

**NB: Whenever possible don't move your child to the next restraint stage unless they've grown out of what they're using.**

Your child▶	Newborn	Over 8Kg	Over 6 Mths old	Grown to Limit of infant restraint	Over 18Kg	Over 4 years old	Grown to Limit of Toddler car seat	Over 26Kg	Over 7 years old	Grown to Limit of Booster seat	For 8,9,10 etc:
Safest advisory guidelines	<b>A</b>	<b>ABB</b>	<b>ABB</b>	<b>BB</b>	<b>BEF</b>	<b>BBEF</b>	<b>E F</b>	<b>F</b>	<b>E F</b>	Seat belt only	<b>E or F</b> If they still fit it.
Minimum required (Road Rules)	<b>A</b>		<b>B</b>			<b>E or F</b>		Seat belt only	Seat belt only	Seat belt only	Seat belt only

Additional Harness use is a requirement of law when there's a 'Lap only' seat belt installed: Check out ACRI FAQ's for this.

## Code Legend:

**A** = Restraint product which has rearward facing capability with an integral harness system. (Generally called a "capsule or infant restraint")

**B** = Restraint product which has forward facing capability with an integral harness system. (Generally called a "Toddler car seat") or substitute **B** outlined below:

**B** = Forward facing restraint as above that meets AS/NZS 1754- 2010 Std (NB: No weight limit criteria)

**E** = Forward facing seat riser which uses a Lap sash seat belt or Lap belt with an additionally added harness. (Generally called a "Booster seat")

**F** = Forward facing seat riser which uses a Lap sash seat belt or Lap belt with an additionally added harness. (Generally called a "Booster seat") This is a more recent version of E and is rated for larger children than an E type. Always read the product label carefully.
